

C-Assignment

Week2:

Day2:

- 1.program to calculate Sum, Product of all elements.
- 2.program to find Smallest and Largest elements from One Dimensional Array Elements.
- 3.program to replace all EVEN elements by 0 and Odd by 1 in One Dimensional Array.
- 4.program to merge Two One Dimensional Arrays elements.
- 5.program to Add and Subtract of Two One Dimensional Array elements.
- 6.program to find a number from array elements.
- 7.program to sort array elements in ascending order.
- 8.program to reverse array element.
- 9.program to swap adjacent elements of a one dimensional array
- 10.program to find occurrence of an element in one dimensional array.
- 11.program to sort an one dimensional array in ascending order.
- 12.program to sort an one dimensional array in descending order.
- 13.program to delete given element from one dimensional array.
- 14.program to create array with reverse elements of one dimensional array.
